

# Student engagement with ICT as an underpinning of the curriculum

Jessie Paterson,  
Hamish Macleod,  
Victoria Dishon

# UG survey of ICT uses & attitudes

- the picture in March of 2011
- 580 respondents; age & gender profile as expected
- very confident; but 2.4% are “very apprehensive”
- 99% own a computer
- 93% have a laptop or netbook device
- only 28% of laptop owners plan to bring them to campus
- 90% have fast internet connection from residence
- eBook reader 8%; tablet 5%; smart phone 50%
- 88% using social networks daily for personal purposes
- 44% using social networks daily for academic purposes

# School of Engineering: Students use of Cloud Technologies in academic assignments

- Survey run in December 2011, with 197 respondents.
- UG and Taught PG
- 94.9% answered yes to using social media and file sharing sites to facilitate academic assignments.
- Facebook groups 75.4% , Google Docs 55.4%, Dropbox 63.1%.
- Mostly for file sharing 92.3% and collaborating on documents 57.9%.
- Frequency of use, weekly 28.2%, all the time 36.4%.
- Only 1% state that University staff setup or created the tool/s they used.
- Evidence of sophisticated co-creation of materials completely outside of University ICT provision.
