

Preparing Medical Students for effective practice: the challenge of transition from medical student to FY1

The Problem

Integrating students into the work place

“For the majority of medical school I have been the observer in the corner rather than doing. There is only so much you can learn by watching.....”

NSS free text comments 2017

Take a moment to remember how you felt the first time you walked into your first job.....

The Challenge

- Changing students perception on their role on in the clinical setting
- Engaging students participation
- Encouraging transfer of skills from classroom to clinical area

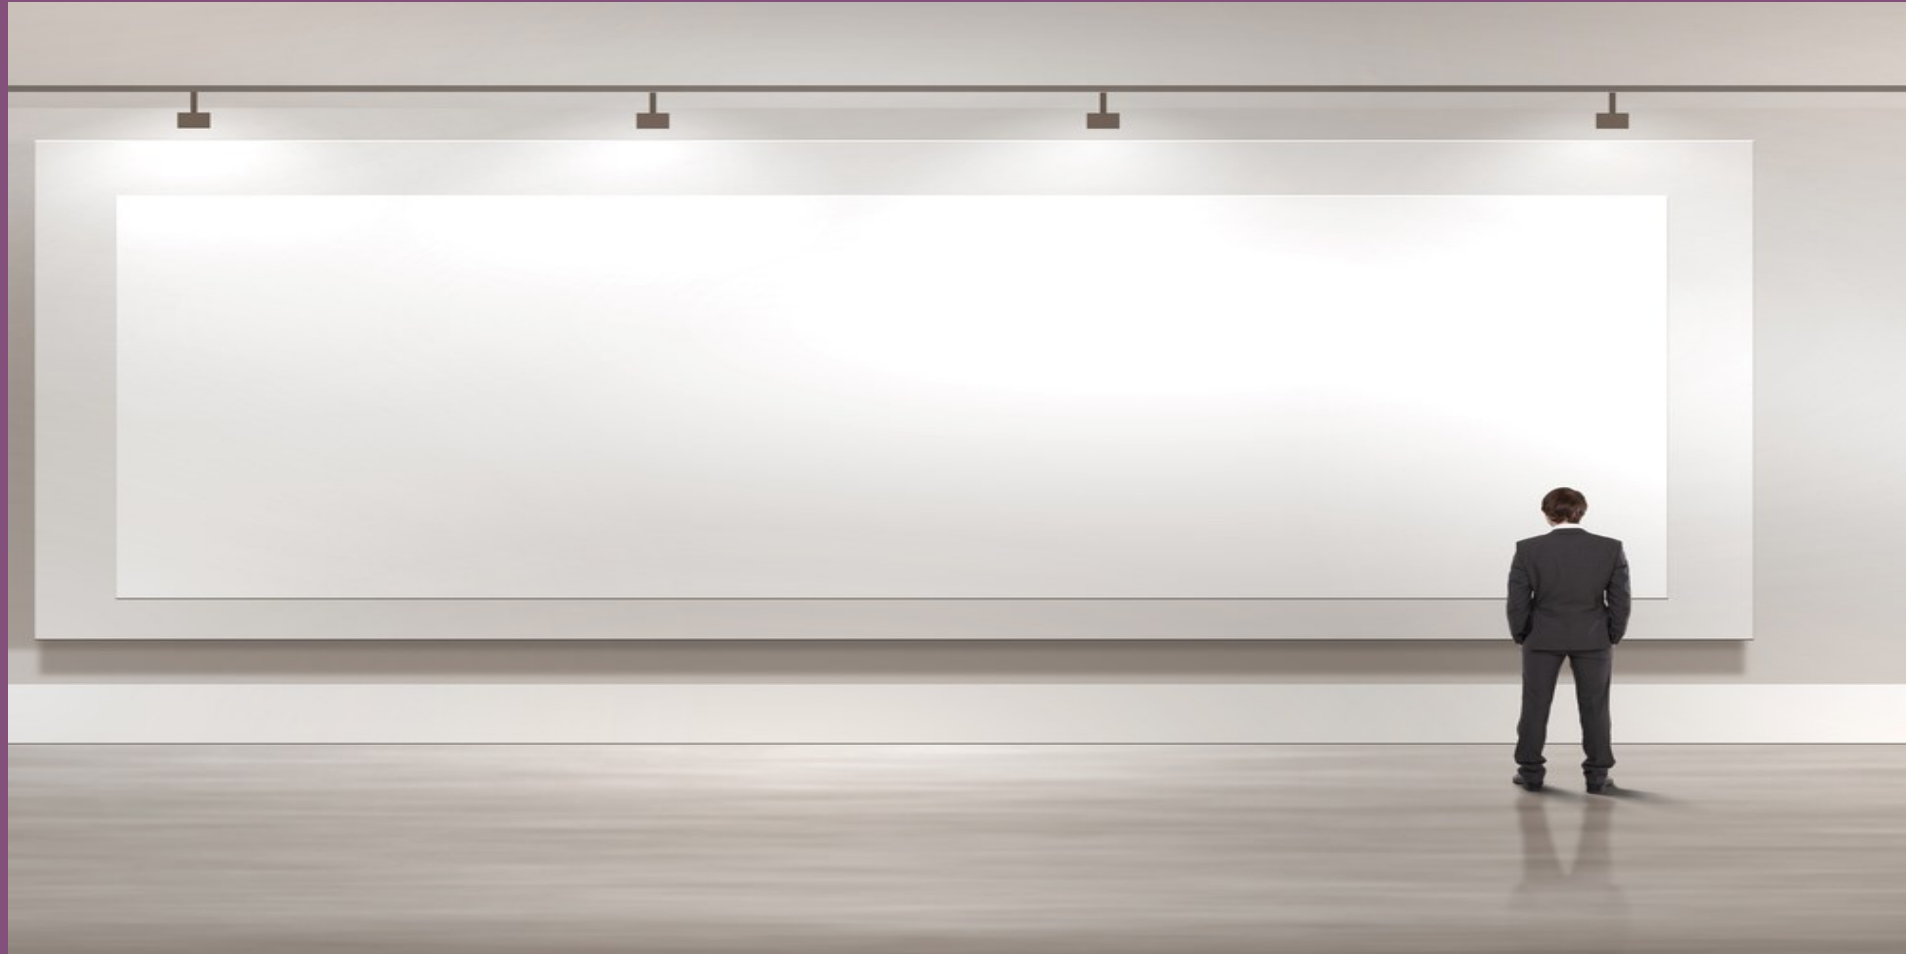

Where we are now...

- Simulation strategy
- Change of curriculum
- Change of name
- Change of curriculum
- TEAM
- Increased Inter-professional education

Where are we going?

- Augmented reality/projection mapping
- Tomorrows Doctors 2019?
- Tactical decision making game
- Interactive lectures to aid the flipped classroom
- New medical school.....

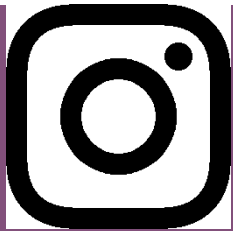

A blank canvas: how do you prepare your students for the workplace?
