

## FEEDBACK ON SKILLS DEVELOPED IN TUTORIALS

A key aim of the tutorials has been to give you opportunities to develop your communication and teamwork skills. As described in the Course Handbook, these skills include:

### Communication Skills

- listening, questioning and explaining
- presenting and defending a position
- giving and getting feedback

### Teamwork Skills

- setting and allocating roles and tasks
- managing time and resources
- encouraging and supporting other team members
- directing and leading the team

We would welcome your comments below on how far the tutorials have succeeded in promoting these skills.

Which of these skills have the tutorials most helped you to develop?

Which of these skills have the tutorials been least helpful in developing?

In what ways have the tutorials been particularly helpful in developing these skills?

Can you suggest changes to the tutorials that might help to develop these skills more effectively?
