

## SUPERVISION LOG (reverse)

PROJECT	COMMENTS WEEK
1	Following the project work briefing, as anticipated C is quick off the mark; ensure remaining students sign up for next week.
2	All project outlines/timetables look like they're coming in fine.
3	Due to technical problems, B needing to slightly re-focus the project; seems okay to me, but check formal procedure with C.O. Needs to be in the documentation?
4	Most people seems to be on track. No more fixed appointments until after vacation.
5	
6	Blocking out wk 5 didn't seem to cause students any problems . . .
7	Looks like technical difficulties aren't the only problems for B (but personal rather than anything general).
