Popular cultures

Film 1: Bendito Machine III (6:35)

Bendito Machine III - Now in HD

[Watch on YouTube](#)

This animated film tells the story of technological development in terms of ritual and worship - the characters in the film treat each new technology as god-like, appearing from the sky and causing the immediate substitution of the technology before it. What is this film suggesting are the ecological and social implications of an obsession or fixation on technology? Do the film's characters have any choice in relation to their technologies? What are the characteristics of various technologies as portrayed in this film?

Film 2: Inbox (8:37)

Inbox - Short Film

[Watch on YouTube](#)

Inbox is a quirky representation of the ways in which web-based technology connects people, the limitations of those connections, and the nature of communication in a mediated world. Depending on how you interpret the relationship between the two main characters, and the ending, you might argue that this is a utopian account, or a dystopian one - what do you think, and why?

Film 3: Thursday (7:34)

Thursday

[Watch on YouTube](#)

Thursday depicts a tension between a natural world and a technological world, with humans caught between the two. What message is the film presenting about technology? What losses and gains are described? Who or what has 'agency' in this

Film 4: New Media (2:21)

NEWMEDIA from MOLI

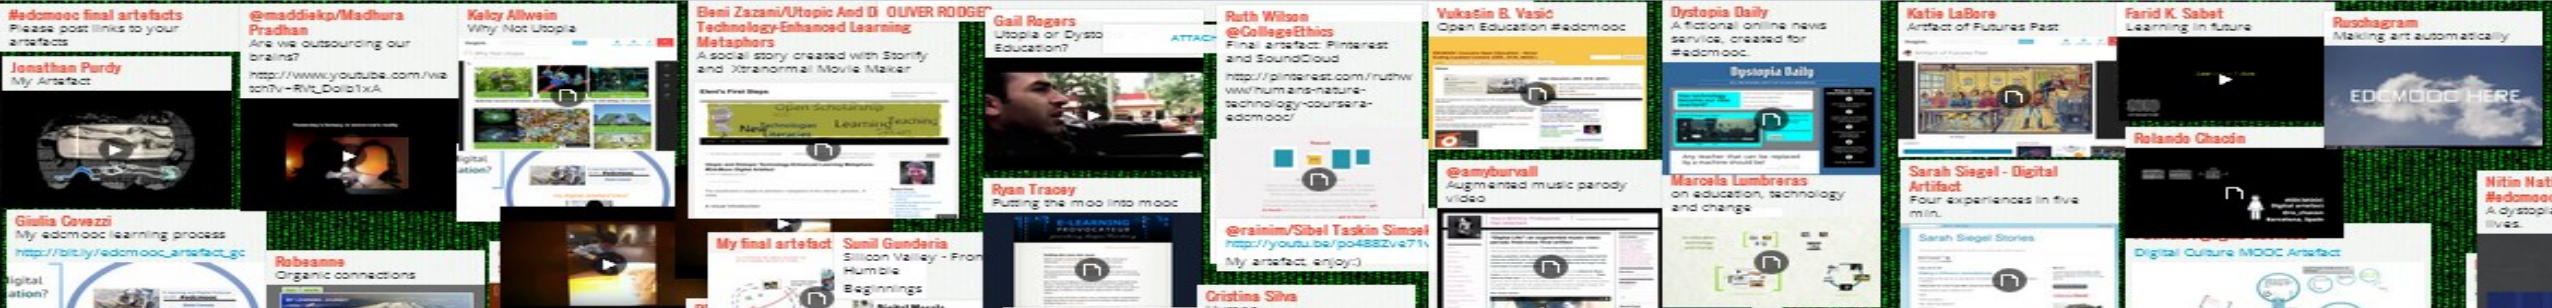

[Watch on Vimeo](#)

A very short, very grim representation of the effects of technology on humanity. There are definite visual echoes

Reflection: Bad Survey Questions

First of all, this questionnaire doesn't include an introduction about the purpose of this survey. Generally, the participants will be confused about why the questions are structured and what they are for.

1. Which subject did you enjoy the most at

Introduction to Social Research Methods

Integration

- All MScDE students to take a MOOC
- Integrating accredited online provision with open access
- Developing a MOOC-for-credit model

Reusability

- Inter-School links through collaboration with SPS Digital Sociology
- Research training for off-campus students
- Reconfiguration by other University programmes

Partnerships

- Partnership with the SAGE Research Methods Database

Integration

- All MScDE students to take a MOOC
- Integrating accredited online provision with open access
- Developing a MOOC-for-credit model

*I am nominating Jeremy Knox for overall best teacher because he always responds quickly and usefully to countless discussion board contributions and replies to emails promptly in support of online learners. **The courses he has run have been innovative, interesting and challenging and run in a variety of formats and technologies with lots of excellent resources.** He is a hard marker but provides helpful and thoughtful feedback which encourages increased effort and performance. His constructive criticism has helped me to improve my work and any good comments have given a real sense of achievement.*

Integration

- All MScDE students to take a MOOC
- Integrating accredited online provision with open access
- Developing a MOOC-for-credit model

Course evaluation – student feedback

- MOOC discussions vs Moodle discussions
- ‘What am I paying for if the MOOC is free?’
- Clear value in ‘openness’ for ‘public’ participants

Reusability

- Inter-School links through collaboration with SPS Digital Sociology
- Research training for off-campus doctoral students
- Reconfiguration by other University programmes

MSc in Digital Society

Apply Now

How to Apply

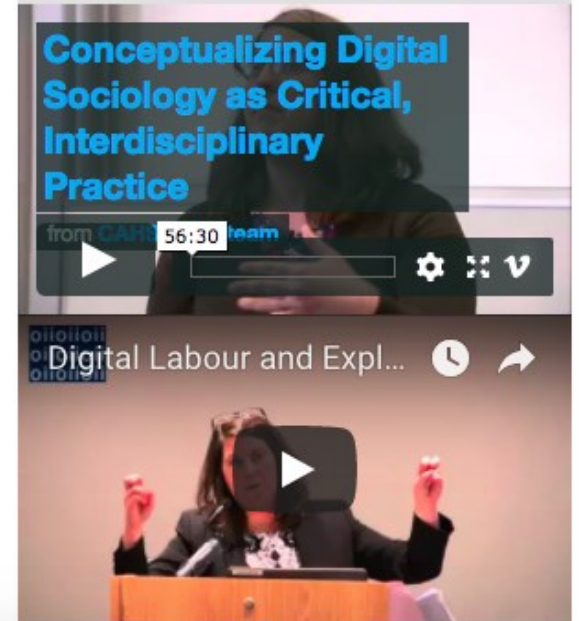

Applications must be made online via the [MSc Digital Society 'Applying' links](#)
The deadline for applications is **13th July 2018**.

A Message from the Programme Director

Welcome to the MSc in Digital Society at the University of Edinburgh! We are proud to offer an innovative, new programme in one of the top Sociology programmes in the UK. This degree directly responds to a growing need for our graduates to be able to critically and creatively study and analyze a world undergoing rapid digital transformation. Digital sociology provides a vital foundation for understanding how digital technologies and data are shaping our social institutions, social relations, and everyday life.
